How to Put Out Kitchen Fires Quiz

1. If there is a fire in the oven or microwave, what two things should you do?

2. If the oven fire continues to smoke and shows no signs of decreasing in intensity, what should you do then?

3. Name 2 ways you do NOT want to put out fire in a pot or pan?

4. Which of these are good ideas? (*circle the letter of all that apply*)

- a) Put a lid on the pot or pan to quench the fire.
- b) Pour flour on the pot or pan to quench the fire.
- c) Put a soaking wet dishcloth or towel over the pot or pan to quench the fire.
- d) Pour baking powder on the pot or pan to quench the fire.
- e) Pour salt on the pot or pan to quench the fire.
- f) Pour baking soda on the pot or pan to quench the fire.
- g) Swat at the fire with a dishtowel or a flat utensil that's handy
- h) Use a fire extinguisher
- i) If you can do it without burning yourself and cannot do it another way, just take the pot or pan outside and put it in the middle of the yard, away from anything flammable.

5. Put these in order: Tell Mamma or Daddy about the fire, Begin trying to put the fire out

6. If the fire is already too big for you to put out without burning yourself, what should you do then?

7. What should you do if the fire is beginning to get out of control and you have not put it out yet
